

The FCC must not regulate Christian Radio. There are plenty of radio stations in which those who are not Christian can share their beliefs and opinions. Allow Christians the same open forum in which to express their beliefs and worship their God just as all those who don't believe have the option to do. A radio station should not have to allow anyone and everyone to call in and be aired. The government needs to quit taking away our right to openly worship and discuss the God in which our country was founded.
